

# GB-602/642

## TRAVERSING INK JET PRINTING SYSTEMS

**GB-602/642** series is an efficient, innovative, Traversing Ink Jet System for in line printing directly onto your package. Utilizing a single or dual Ink Jet print heads, these Head Motions Systems automatically print multiple rows of packages in both web directions: with the web, across the web or a combination of both. It's the perfect solution for all multi-lane applications. Fully programmable, these printing systems have the capabilities to print Bar codes, lot numbers, time date serialization. With the ability to print up to 4 lines of type with a single print head the Ink Jet solution offers a great variety of print options to meet your particular need.

Up to four lines  
of type with a  
single printhead

Ultra high speed  
capabilities

and non forming  
webs

Uses single or dual  
head printers

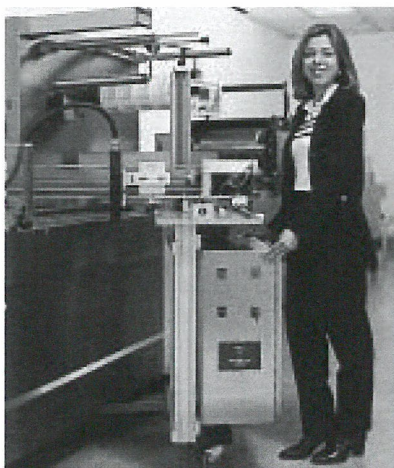

### Options

Greydon's Ink Jet Systems can be mounted to print on the Non Forming Web, or the Forming Web. Top or bottom of package or item. In addition because it is a non contact printing system the options of location to print during the packaging process are numerous.

### Mobile Stand

Greydon offers an optional mobile which allows for ease of movement and installation in applications where access to the printing area is necessary.

### Service and Support

Our parts department provides immediate access to a complete inventory of replacement parts and accessories. In addition, our Technical Service Department is always on call to help troubleshoot problems and help deliver fast reliable service.

### Print Technology

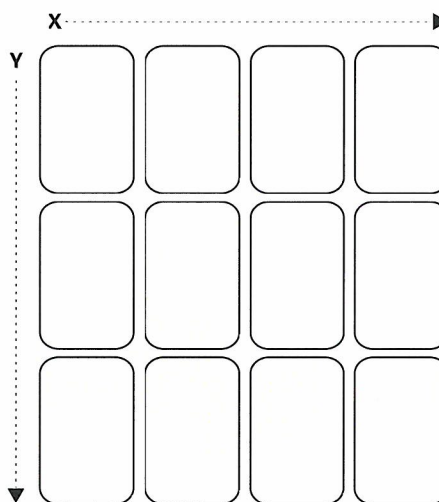

Greydon's Head Motion System is used with all Ink Jet Technologies.

### Printing Solutions

Greydon's Head Motion Systems give you many options to solve your printing application.

- GB-602 series for printing across the web with a single or dual print heads.
- GB-642 series for printing any combination of x and y. We also offer a high speed version of both units when cycle speed is the critical factor.

Greydon can help you determine which system is the most effective and economical solution to your particular application.

PRINT MULTIPLE ROWS OF PACKAGES WITH A SINGLE PLATEN PRINTER.
