

GC220-CRA WET INK PRINTER

CODEAIR SERIES TAPED BAG PRINTER

Greydon Inc. has introduced its Model **GC220-CRA** wet ink contact printer designed to retrofit to a taped bag loader such as the Cryovac 8189. The Codeair gives 100% readable, reliable codes by sensing the gap in the shingled bags. Using an air knife separates the bags and exposes the surface of the bag below for printing. The GC220 model uses a wet ink cartridge and rubber type to stamp the bag once the bag is exposed. When programmability is necessary, the Model GB-602-CRA ink jet printer is available. Both models use the same patented method of separating and orienting the bags.

Ideal printing code
dating and EST.#

Cycle speeds to
75 per minute

Great ink adhesion
on powder coated
shrink bags

Washdown

Uses low cost
disposable ink

Uses Greydon
1-piece date sets

State of the art
INKAP printhead
seals ink from
plant air

Print area 2" x 2",
2" x 4" or 4" x 2"

Easy install with
all necessary
components
supplied

100% reliable,
readable codes

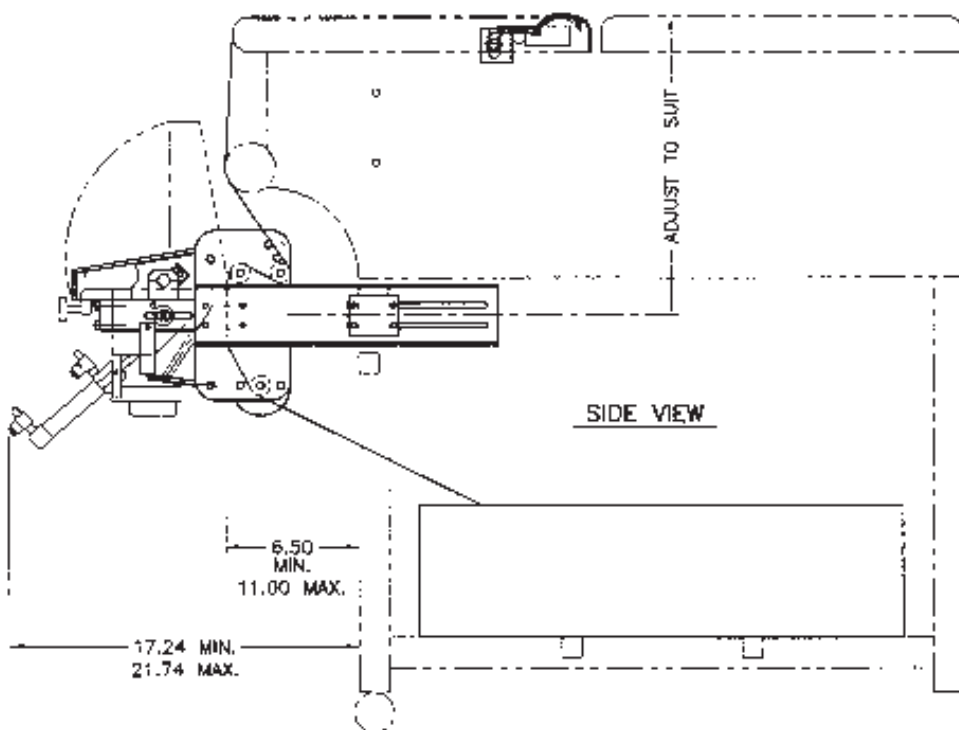

Service and Supplies

Greydon offers a disposable ink cartridge system for all our coders along with a complete range of Ribbed type. Our parts department provides immediate access to a complete inventory of replacement parts and accessories. In addition, our Technical Service Department is always on call to help troubleshoot problems and help deliver fast reliable service.
