

Print areas 2"x4",
4"x2", 4"x4"

Ideal for printing an
entire nutritional
mat onto packages.

Easily installs on
horizontal/vertical
form fill and seal
packaging, carton-
ers, labelers and all
intermittent motion
packaging machines

Easy operator
access for fine
tuning adjustments

Uses low-cost
disposable ink
cartridges

State of the art
INKAP printhead

GC-4200/4400

RECIPROCATING WET INK IMPRINTER

Greydon Inc. introduces the **GC-4200/4400 Reciprocating Wet Ink Imprinter**. The GC-4200/4400 offers several features unmatched by printers of the same type. The GC-4400, four-inch by four-inch print area is the largest print area in the industry, making it possible to print an entire nutritional mat onto a package. The GC-4200/4400 also saves operating costs, thanks to low-cost disposable ink cartridges and the INKAP printhead, which monitors ink absorption and print consistency while extending cartridge life. The GC-4200/4400 is designed for use on a range of applications from date codes to logos, with applications for virtually any substrate. It installs easily on horizontal and vertical form-fill-and-seal packagers, cartoners, labelers, and all intermittent-motion packaging machines. The all-stainless steel construction makes it ideal for use in a washdown environment.

Service and Supplies

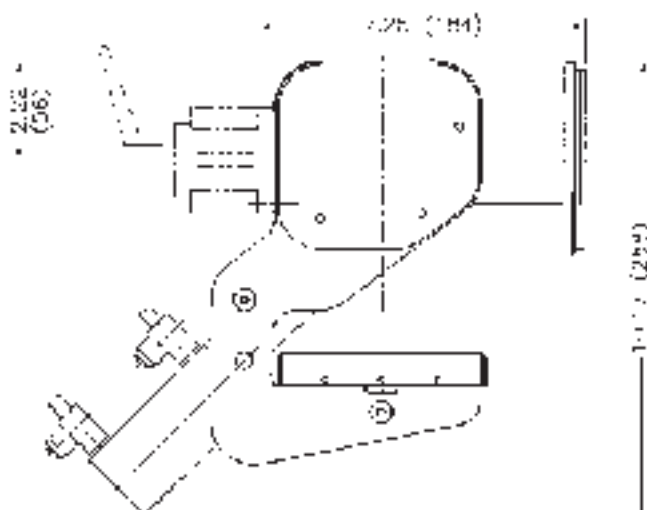

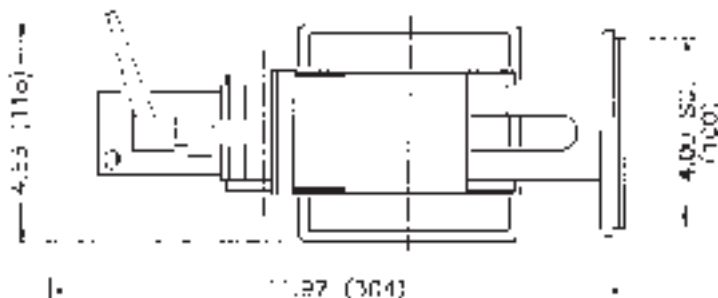

Greydon offers a disposable ink cartridge system for all our coders along with a complete range of Ribbed type. Our parts department provides immediate access to a

complete inventory of replacement parts and accessories. In addition, our Technical Service Department is always on call to help troubleshoot problems and help deliver fast reliable service.

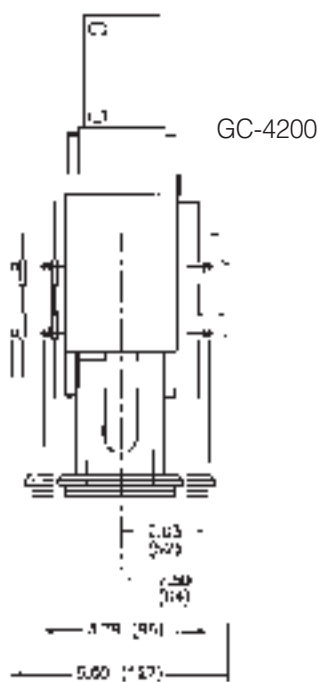

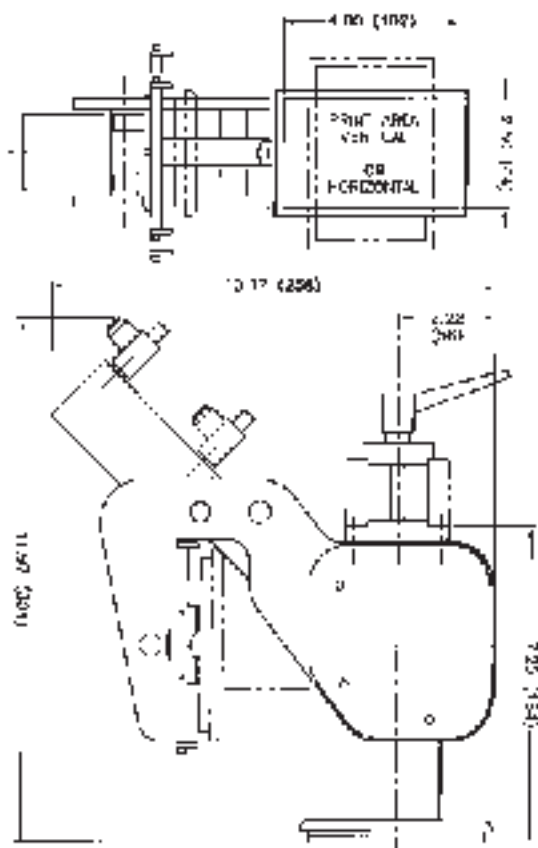

Greydon's innovative involvement in the packaging industry has kept us in touch with the changing needs of our customers. In response to those needs we have put together a complete line of high quality, in-line printers, offering you a variety of solutions for all your imprinting applications.
